Staal & Plast – Accessories

**staal
plast**

Rubber plugs:

- Diameter conical 26/32 mm.

The rubber plug works like a wine cork.

The rubber plug is often used for sales irrigation tables.

When the rubber plug is removed the tray can be flooded with fresh water and the soil and other residuals can be flushed through the drain hole.

Repair corner:

- Dimension 40x45 mm

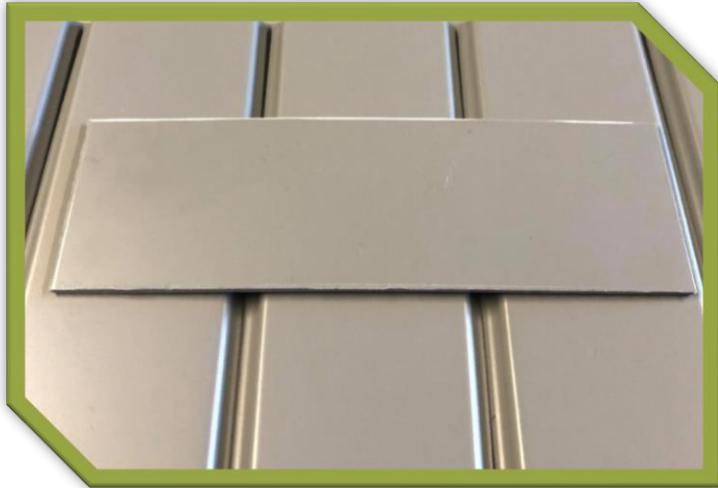

If a tray corner is damaged, it can be repaired. Clean and dry the surface, apply Staal & Plast glue.

Seal around the edges if necessary.

For more information see the glue product sheet.

Repair piece for sump

- 175x55 mm

If the sump is damaged, a new piece of material can be glued in.

Clean and dry the surface and apply Staal & Plast glue and seal around the edges.

Drill new valve holes if needed.

For more information, please see the glue product sheet.

Cover for sump, grey

If you want to remove an existing sump, it can be covered.

Clean and dry the sump area, apply Staal & Plast glue and seal around the edges of the sump cover.

For more information please see the glue product sheet.
