Stål & Plast – Filters

**staal
plast**

Filters

The filter will prevent the sump valves from being clogged by leaves, soil and other residuals.

The filter is level with the tray surface and pots can be placed directly on the top for an optimized growing area.

The circular logo piece can be easily clicked out of the filter to allow a sump valve to stick through.

The filter can easily be clicked in and out of the sump for cleaning.

The filter fits all our tray types
(except 330.3, 435.4, 630.4 4-sided,
CC, ½CC, EUR.
