Tropicals

Catalogue 2026-2027

At Evanthia we do everything we can to get growers off to a good start with a successful crop.

evanthia

Cover: Monstera deliciosa tauerii / Asparagus myriocladus / Strelitzia reginae

“At Evanthia, we like to think ahead. That’s why we’re showcasing a powerful line-up of tropical plants, ready to meet today’s and tomorrow’s challenges.”

“Summers are getting hotter, weather extremes more frequent, and rainfall increasingly unpredictable. Across many regions, prolonged droughts and stricter water usage regulations are becoming the new normal. For professional growers, these challenges also present opportunities—provided you respond with the right crop choices.”

“With a broad and diverse range, Evanthia offers the flexibility to adapt quickly when challenges or new opportunities arise. In changing times, this adaptability is key – and at Evanthia, “NO” is never an option. We have built a strong global network of plant collectors and partners, many of whom we’ve worked with for years. These experts venture into remote and often inaccessible regions in search of the finest seeds. Thanks to our trusted production locations across the world, we manage every step of the process to deliver high-quality starting material for commercial growers. One of our core focuses today is expanding and strengthening our drought-tolerant assortment. As water scarcity and climate variability become more pressing issues, we continuously develop and select varieties that can thrive in dry conditions without compromising on performance or visual appeal. Our broad range includes resilient genetics that offer growers confidence, even under environmental stress. Moreover, Evanthia’s product range is so extensive, you’ll be amazed at the

opportunities and smart alternatives we can offer – even in the face of an unexpected shortage. We’re here to ensure that your business stays resilient, future-focused, and ready for whatever comes next.”
Discover What’s Growing at Evanthia
In this new catalogue, you’ll find a curated selection of highlights from our extensive tropical plant assortment. But don’t stop there – if you’re looking for a specific species or variety that isn’t listed here or on our website, just ask! Chances are, we can source it for you. At Evanthia, we pride ourselves on being your go-to partner – a true one-stop-shop for anyone already in, or entering, the exciting world of tropical plants. Everything begins with a tiny seed or a young plant. That’s why we offer a wide selection of raw seeds, as well as enhanced seeds with specialized coatings or pelleting for better sowing and germination performance. Some tropical varieties are known to be tricky to grow from seed – but that’s where our expertise comes in. With years of hands-on experience, Evanthia can deliver top-quality young

plant material even from the most challenging crops, like **Strelitzia**. Beyond seed-raised plants, we also offer an extensive range of tissue culture young plants, ensuring consistent quality and strong performance right from the start. Our support doesn’t stop at delivering great products – we’re here with tailored technical advice and personal service every step of the way. Together, we can exchange knowledge, spot emerging trends, and respond to market demands with successful new products. Let’s grow stronger, greener, and smarter – together.

Pieter’s personal favourites

PieterLock travelsthe world to selectthebestsources for our extensive product range, featuring high demand, extraordinary and rare items. Evanthia’s customers can count on our solid network and stable supply. Let’s take a closer look at a few of Pieter’s personal favourites.

1 Alocasia Imperial Red®

AlocasiaImperialRed isa truly regal tropical foliage plant, with an interesting and distinctive feature: this green showstopper has striking red stems, which explains its name. This Alocasia variety has large fresh green leaves with a natural gloss and can provide a lot of volume. Alocasia is native to the tropical and temperate parts of Southeast Asia as an evergreen perennial.

2 Cordyline Pink Passion®

This exotic, subtropical eye-catcher is adorned with dense clusters of sword-like, purple/pink leaves with bright pink edges. The leaves are narrow and arching and have a tough, leathery texture. Cordyline australis ‘Pink Passion’ a great architectural plant for patio containers and landscaping.

3 Philodendron Sunlight

Philodendron Sunlight is an exceptional ornamental plant admired for its striking display of color and refined growth habit. Are you looking for a bright addition in your Philodendron assortment, you might want to consider the Sunlight.

4 Strelitzia reginae

Strelitziareginae is apopular subtropical foliage plant is well-known for its exotic large, upright, banana-like leaves and extraordinary flowers. Strelitzia reginae grows striking orange and blue flowers nestled within its grey/green leaves. Did you know these long-lasting flowers usually appear 3 to 5 years after germination?

5 Yucca rostrata

Yucca is theplantof tomorrow, with its architectural form and exceptional drought tolerance. Robust, sculptural and remarkably resilient, Yucca thrives in dry, cold and challenging conditions. It’s smart to grow Yucca alongside crops with similar needs. Think Eucalyptus, Ravenala, or Aloe — all species that thrive under comparable conditions.

Araucaria

Araucaria excelsa

- Decorative, pine-like evergreen foliage
- Easy to grow and adaptable to various climates
- Ask our team for the timing of new harvest

Asparagus

With Asparagus fern you can go in so many different directions, it might dazzle you. Asparagus is a true all-rounder, reliable, easy to grow and useful in a wide variety of situations... not to mention all the different shapes, forms and growth habits.

As one of the fastest growing and least demanding plants, these glorious greens are highly adaptable to various climates. They are fairly drought tolerant and can handle relatively cool temperatures and shady to bright light conditions (avoiding direct sunlight). You can grow them as long-lasting cut foliage, in pots and even – since some are quite root hardy – for landscaping. Go for a hanging or upright focal point and pick sturdy or soft and fuzzy items for your range. There is so much to choose from.

Evanthia offers starting material in the widest range of ornamental Asparagus and has build up a lot of technical knowledge and experience, to help you get started.

Asparagus

densiflorus Cwebe

- Finely textured compact plant with an upright habit
- Needle-like foliage that turns more reddish/copper over time
- Decorative houseplant and cut foliage

Asparagus

densiflorus Mazeppa

- Highly compact and dense habit
- Robust Asparagus with arching woody stems and fine fern-like leaves
- Suited as houseplant, garden plant and for cut foliage production

Asparagus

densiflorus meyerii

- Bushy, compact plant with upright habit
- Long, plume-like stems, resembling foxtails
- Can be used as a houseplant, garden plant, for landscaping, in hanging baskets or as cut foliage

Asparagus

densiflorus myriocladus

- Finely textured with a bushy, compact habit
- Strong woody stems and fluffy bright green tufts
- Can be grown as houseplants and cut foliage

Asparagus

densiflorus Sprengerii

- Upright habit, later on more cascading
- Great for indoor and outdoor pots, in hanging baskets and as cut foliage
- Long arching branches filled with delicate, feathery foliage

Asparagus

falcatus

- Robust plant with vigorous growth
- Dark green, sickle-shaped leaves
- Can be used as houseplant and cut foliage

Asparagus

medeoloides smilax

- Low growing, with a climbing and creeping habit
- Distinctive, tiny oval-shaped leaves on long trailing branches
- Suited as hanging plant, a guided climber and cut foliage

Asparagus

setaceus plumosus nanus

- Fast-growing, with an extensive climbing habit
- Delicate appearance with tiny, fine needle-like leaves
- Great as houseplant and cut foliage

Asparagus

setaceus Pyramidalis

- Bushy, upright habit with a dense pyramid-like growth
- Forms shoots of lacy, dark green, fern-like plumes
- Makes for a great houseplant

Asparagus

virgatus

- Bushy, well-branching with an upright habit
- Tiny, soft thread-like leaves arranged like little brooms at the stems
- Mainly grown for cut foliage production

Chlorophytum

Chlorophytum
orchidastrumPrincess Mabel

- Striking foliage plantswithorangestemsand deep green leaves
- Upright, clump forming habit
- Easy care, air-purifying houseplant

Coffea

Coffea
arabica

- Bushyand compact coffee plant
- Decorative shiny bright green foliage
- Interesting plant with a great story to tell

Fatsia

- Relatively easy to grow
- Large, decorative deeply lobed glossy leaves
- Versatile as garden plant, container plant and house plant

Find more Fatsia varieties on page 26.

Fatsia
japonica

Cyperus

Cyperus
Zumula

- Decorative, fresh green, grass-like foliage
- Versatile as house plant, cat grass and (water) garden plant
- Robust and easy care

Dizygotheca

Dizygotheca
elegantissima

- Decorativereddishgreen saw-tooth leaves
- Versatile houseplant
- Easy to combine with Schefflera production

Grevillea

Grevillea
robusta

- Decorative,fern-like silver green foliage
- Easy to grow and adaptable to various climates
- Well-suited as a hedge, full grown tree, container plant and low growing house plant

Monstera

Monstera is a remarkable statement plant and enjoys extreme popularity. Its striking leaves instantly impress and inspire. With aerial shoots and a strong climbing habit it takes over any interior, turning it into a true tropical decor. *Monstera deliciosa Tauerii* has large, heart-shaped leaves with lots of perforations and notches. Tauerii is a dwarf-type *Monstera deliciosa* and develops its leaf perforations particularly early. This plant tends to set earlier than other Monstera. It's great for both cut foliage and potted plant production and available as seeds and young plants from seed.

Find more Monstera varieties on page 27.

Monstera
deliciosa Tauerii

Pilea

Pilea is widely appreciated for its extraordinary leaf shapes, textures and colours. It has for sure the interest of the new generation plant buyers and tropical enthusiasts, which results in a fixed high ranking on top houseplant charts.

Take the coin-shaped leaves of the *Pilea peperomioides*, the Moon Valley with its quirky textured leaves or the remarkable, variegated Silver Tree. Grow them together in smaller pot sizes for an irresistible display on the shop floor.

Pilea
Moon Valley

Pilea
peperomioides

Radermachera

Radermachera
sinica

- Decorative with lots of shiny green foliage
- Fast-growing, compact and bushy plant
- Grown as a compact house plant, as a bonsai or with a tall trunk

Nolina

Nolina
recurvata

- Robust, drought-tolerant semi-succulent
- Decorative fountain-like leaves
- Tolerant to a wide range of growing conditions

Pachypodium

Pachypodium
lamerei

- Decorative, easy to grow succulent
- Tolerant to a wide range of growing conditions
- Well-resistant to pests and diseases

Philodendron

Philodendron
selloum

- Vigorous, non-vining growth habit
- Large, deeply lobed leathery leaves
- Can grow to colossal size

Find more Philodendron varieties on page 29.

Schefflera

- Lots of glossy foliage
- Easy care, formable houseplant
- Adapts well to various conditions

Schefflera
actinophylla

Schefflera
arboricola

Cut foliage

From an average filler to the foundation of floral arrangements, from the background to the backbone of any bouquet, rustic and robust, the leading lady in all-green bunch, nature in its most original form and colour... Cut foliage is finally being properly valued and is reflected in the most popular and long-lasting floral trends. Scandinavian greenery trends, loose and organic, neutral and natural vibes, exotic and tropical – foliage greens are incorporated in virtually all major current it-styles. It's time to take a closer look at what's out there and highlight our favourite florist's greens!

Asparagus setaceus plumosus nanus

Asparagus

- Versatile, various textures and green hues
- Huge choice of varieties

Eucalyptus pulverulenta Baby Blue

Eucalyptus

- Sweet/minty scent, trendy
- pale colours
- Long-lasting, robust branches
- Broad range with various leaf shapes

Fatsia japonica Variegata

Fatsia

- Glossy and bold, hand-shaped leathery leaves

Monstera deliciosa Tauerii

Monstera

- Hugely popular tropical foliage
- Best choice to create major impact

Philodendron selloum

Philodendron

Ruscus aculeatus

Ruscus

- A classic with shapely green, shiny leaves
- Perfect for a dainty, soft touch

Strelitzia reginae

Strelitzia

- All-time favourite tropical stunner
- Super versatile and bendable

And this is just the tip of the iceberg! At Evanthia you will find a broad line of cut foliage to boost your product range. We offer everything you need to get off to a good start with cut foliage and to help you grow a crop that's perfect for your unique business.

Check the assortment list of this Tropical Plants Catalogue at page 36 for a complete overview of our tropical foliage, marked with a

Strelitzia

Strelitzia, a.k.a. Bird of Paradise, is a popular subtropical foliage plant, well-known for its exotic large, upright, banana-like leaves and extraordinary flowers. It makes for a great houseplant and can be used outdoors during warmer periods as well. Strelitzia reginae is the most common and widely used Strelitzia for pots and cut flower culture. It grows striking

orange/blue flowers nestled within its greyish green leaves. 'Mandela's Gold', formerly known as Kirstenbosch Gold, is a rare reginae type Strelitzia with yellow/blue flowers. Strelitzia nicolai has a somewhat different plant structure. The leaves of S. nicolai are fewer but larger than the reginae types. It has blue/white flowers. Strelitzia's long-lasting flowers usually appear 3 to 5 years after germination.

Evanthia has Strelitzia starting material available all year round, as seed and young plants from seed. Growing plugs from Strelitzia seeds can be quite challenging. Evanthia has tons of experience and is happy to do the work for you. For a quick and easy start, order Strelitzia young plants. Ask our team for the Strelitzia cultivation manual for commercial production.

Alocasia

Alocasias are fashionable exotics with impressively large leaves on sturdy stems. Evanthia offers an interesting line-up of varieties, each with its own characteristics. Foliage and stems vary in terms of texture, shape, size and colour. With the right care, Alocasia is one of the fastest-growing houseplants out there. Our Alocasias are available as tissue culture young plants with a rapid growth cycle.

Alocasia

Calathea

Discover Evanthia's bold line-up of Calathea beauties and select the showstopping items that will uplift your entire collection. We offer great varieties with striking leaf colours and patterns. Most Calatheas earns the nickname 'living plant' or 'prayer plant', because they close or rise their leaves at night and uncurl or lower them again in the morning. Especially with these stunning leaf patterns and contrasting backsides this funny nocturnal feature is truly special.

With such a wide range of varieties there are significant differences in growth habits, plant size and volume. In order for all items to reach their full potential, it is important to choose a fitting pot for every variety. Check our website for more information on variety level or ask our team of experts for advice, while composing your own range of Calatheas.

Monstera

Monstera is a remarkable statement plant and enjoys extreme popularity. Its striking leaves instantly impress and inspire. With aerial shoots and a strong climbing habit it takes over any interior, turning it into a true tropical decor. *Monstera adansonii* is smaller than the dwarf type *Monstera deliciosa* and has fresh green, heart-shaped leaves. Unlike other Monsteras, *M. adansonii* only develops leaf perforations and no leaf notches. The holes are visible at a very early stage. *Monstera Thai Constellation* is a beautiful, tropical foliage plant with large, heart-shaped leaves and a strikingly variegated pattern in shades of cream and green. *Monstera Thai Constellation* has both leaf perforations and deeper leaf notches, adding to its decorative appearance.

polybotrya Raindrop

Philodendron

Philodendrons are true tropical beauties with many different appearances, sizes, shapes and colours. Our Philodendron range contains climbing varieties, with long woody stems and highly decorative leaves and non-climbing varieties with a bushy, upright habit. They

make for stylish, low-maintenance houseplants with great air-purifying qualities. Evanthia has a broad range of Philodendron varieties available as seed and young plants from seed or tissue culture. Check our website or ask our team for our Philodendron cultivation manual.

Philodendron
Fun Bun

- Long, slender stems with a fan of broad, green leaves on each stem
- Hand-shaped leaves grow wide apart, creating lots of volume quickly

Philodendron
gloriosum

- Heart-shaped leaves with white leaf veins and a velvet texture
- Makes larger leaves as it ages
- Voluminous plant, can be trained along a moss pole

Philodendron
hastatum Grey

- Strong climbing habit
- Elongated, shiny leaves
- Colour-changing from pale grey to dark green to metallic bluish

Philodendron
Imperial Green

- Densely growing, leathery leaves fan out from the centre
- Large, oval-shaped foliage with a fresh lime-green colour
- Non-vining, self-heading with a compact habit

Philodendron
Imperial Red

- Densely growing, leathery leaves fan out from the centre
- Colour starts bright reddish/green and turns more dark over time
- Non-vining, self-heading with a compact habit

Philodendron
Minima

- Vining, with a very vigorous growth habit
- Heart-shaped, deeply cut, glossy green leaves
- Great for hanging baskets or trained along a moss pole

Philodendron
selloum

- Vigorous, non-vining growth habit
- Large, deeply lobed leathery leaves
- Can grow to colossal size

Philodendron
Zebra

- Remarkable white stripes on dark green oval leaves
- Leaf pattern intensifies with age
- Non-vining, compact habit

NEW
